

Straight, No Chaser - Episode 8 - Nanoparticles in the Food Chain

First Aired - 12/11/2011 01:00PM

What is nano technology and how does it relate to food? Tune in to a scientific episode of Straight, No Chaser and find out about how things like nano silver in food packaging can potentially be harmful if it gets in our food. The FDA's existing regulations do not require nano technology to be tested for in food, and Katy speaks with Michael Passoff, Senior Strategist on Environmental Health Issues for **As You Sow** & Dr. Jennifer Sass of the Natural Resources Defense Council to learn more about nano particles and how they relate our food safety. This episode was sponsored by Cain Vineyard & Winery.

"The FDA's existing regulations do not require nano technology to be tested for in food" - Michael Passoff on Straight, No Chaser, 12/11/11
